Adnan Farzand Ali

has successfully completed the online, non-credit Professional Certificate

Unilever Supply Chain Data Analyst

With an expected growth rate of 18%, there hasn't been a better time to enter the field of supply chain analytics. In this program, you'll learn in-demand skills like data analysis, demand forecasting, and cost analysis to get job-ready in less than 4 months, with no prior experience needed to get started. This program is designed for entry-level professionals, business administrations graduates and those with strong problem solving, time management, and organizational skills. You will learn the foundational skills employers seek for entry level supply chain analysts roles and get hands-on experience cleaning, filtering, sorting, and presenting data.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
